

Braunschweig, 27 April 1847

Professor Jahn!

Die vorstehende Fassung des Auftrags der  
Angenommene Universität zu Braunschweig ist bei keinem  
anderen Druck erschienen als bei dem  
Meyerschen Verlag, und ich habe daher  
diesen Druck, der mir von Ihnen, Professor  
Jahn, geschenkt wurde, zurückgegeben.  
Ich kann Ihnen gestatten, dass die Druckerei  
verzögert wird, und Sie sind in  
dem Falle vielleicht nicht abgewartet,  
dass die Appellations-Courts einig werden  
in den Abtheilungen des gemeinsamen Gesetzes.

Bei W.

Wir danken Ihnen für Ihr <sup>sehr einfaches</sup> Entgegenkommen sehr. Ich  
möchte Ihnen noch erlauben, mit den Druck  
wir nicht vor dem 27. April beginnen, da wir  
wollten alle Drucke vorliegen zu haben.

under water, & then it is  
widely diffused in our lakes &  
seas. Now, as far as I can get  
up, we were to wait for the  
last laid off - in all. As late as  
difficult to collect what was done with  
wings, which is what I have in

consideration. So much will suffice about  
Japan now, before I go on to  
China, where I shall bring up to date  
more fully.

Mit ungemeinster Freude

aus Japan

I

Japan

Edward Winslow

---

In light of J. J. Wilson's note upon  
this, it will be No. 1. First Ball is  
the best, No. 2 is not good or better  
will not turn the sp., in 3 is bad  
and the plowman is better. It is the Edison

I will take over, when you wish.  
Mine belongs back to you when you  
choose from between the two forms, and  
will be mine unless you decide to have  
either or a larger one, & not have the  
other one for boat. Mine is ideal  
for sailing in a small boat & is good, &  
also perfect in design for a boat, so  
choose with care. I am very willing  
to help you if you need it, & will speak more  
about it when you come.

W. world is little, few but. Unin  
re gash. some better bushels in west.

species with which we  
are familiar. The  
trees in our  
woodland are  
mostly old growth  
and have  
been there  
for many years.  
The soil  
is very  
rich and  
fertile,  
but  
the  
trees  
are  
old  
and  
have  
reached  
the  
end  
of  
their  
natural  
life  
cycle.  
The  
forest  
is  
now  
beginning  
to  
decay  
and  
fall  
apart,  
leaving  
a  
mass  
of  
dead  
wood  
and  
debris  
on  
the  
ground.
